EXPERIENCE

Best Egg (Flexible Rent)

New York, NY / Remote (04.2021 – Present)

Lead Software Engineer II

- As a lead, I manage projects from concept to completion. This includes collaboration with design and product stakeholders, writing documentation and ADRs, creating ticketed work, and refining as a team.
- In addition to prioritized work, I oversee our component library, automated E2E testing framework, unit testing, logging and alerts, and user behavior monitoring across our apps. Beyond coding, I'm helping to level up our team of engineers through pair programming sessions and code critiques.
- Coordinated a major UI migration, from React to Vue, and ensured a seamless transition for users.

Stack: React, Vue, Nuxt.js, Typescript, JS Docs, Node.js, AWS, Lambda, API Gateway, DynamoDB, Cloudformation, Serverless, Cloudwatch, DataDog, AWS Cognito, Jest, Vitest, Python, Selenium, Figma

Squad

Washington, D.C. (04.2020 – 03.2021)

Co-founder / Developer

- As a technical co-founder, I built and designed [Squad](#), a collaborative task manager for small teams.
- Squad is a full-featured SaaS product built using React and Next.js that leverages Socket.io, which allows teams to see updates to a shared task list in real-time. Today, we have dozens of active users and a few paying customers.

Stack: React, Next.js, Socket.io, Stripe, MongoDB

EVERFI

Washington, D.C. (08.2019 – 03.2020)

Director of Web Operations

- Managed a team of internal Wordpress developers and an external web agency. We rebuilt Everfi's marketing website in just a few months to align with the company's new product direction. This new version improved blog performance, achieving a 50% decrease in page load time and improved conversion rate.

Stack: Javascript, PHP, Wordpress, Marketo, Salesforce, Clearbit, Google Tag Manager, Google Search Console

CVENT (Social Tables)

Washington, D.C. (01.2016 – 03.2019)

Web Developer, Marketing

- Coordinated a massive website migration project. Transitioned dozens of product pages and over 500 blog posts to a new more flexible Wordpress framework, enabling faster iteration.
- Optimized page performance and search ranking by reducing load time by 25%. Achieved a 50% YoY increase in overall website traffic and a phenomenal 120% YoY growth in organic search traffic.
- Managed Hubspot and Salesforce database of nearly a million contacts to track and report on customer lifecycle stages and revenue attribution.

Stack: HTML, CSS, SCSS, PHP, Wordpress, Hubspot, Salesforce, Sketch, Google Tag Manager, Google Search Console

Additional Projects

- [Queen Ballers](#) (Side Project) - A women's basketball media destination built from scratch using React with Next.js
- [Greywing](#) (Freelance, YC W21) - Built and designed early UI for a cargo ship fleet management platform and the accompanying marketing site.
- [Vodium](#) (Freelance) - Built out a turnkey SaaS business, which included an Electron desktop app, marketing site, and Stripe payment integration. The team raised a \$150,000 seed round pitching this version of the product.
